### PROFILE

A self-taught, client-focused software developer with 4+ years of experience in Enterprise level application development. Adept at all stages of the software development life cycle from requirement gathering to deployment & maintenance.

Recognized for bespoke communication & application development that optimize business performance & generate positive customer feedbacks. Proficient with object-oriented programming languages as well as algorithms. Enjoys collaborating with colleagues & building cultures of cross-functional working to provide a greater platform for the success of projects and the company.

### WORK EXPERIENCE

#### Software Developer

TechSeed Lanka (Pvt) Ltd.

12/2016 to 05/2021 - Gampaha, Sri Lanka

At TechSeed Lanka, I was working mainly on Java (Swing), MySQL, Jasper Reports.

As it is a startup company with only 02 developers until April 2019, I was solely responsible for requirement gathering, developing, implementing, & maintaining a robust user-friendly enterprise application for stakeholders.

I collaborated with stakeholders & business staff, design staff of my company in the planning, designing, developing, implementing & improving stages.

I also take part in end user trainings & support when it is necessary.

After April 2019, I led a team of 3 developers to redesign & redevelop the Point-of-Sales system of our company by making it more secure, user friendly & robust with integrated payment gateway. We were able to reduce 80% of complains & negative feedbacks comparing to last year.

Time to time I worked in web base projects as front end developer with HTML,CSS, JavaScript(Vanilla), Bootstrap, WordPress.

**Key Achievement:** In 2017, With support of my colleagues, I was able to find a solution for the complicated payroll management system of shift basis service providers like private security firms & janitorial service providing firms. Our client highly appreciated the Payroll & HR application we built for him and he was happily and willingly introduced us to many more customers. Most of them are high reputed private security firms in Sri Lanka. Then it became the largest enterprise application of our company by generating over 50% of revenue per year.
